Biography

I was born in Ankara in 1981. I completed primary, secondary and high school education here. I graduated from Ankara University, Department of Geophysical Engineering in 2002 with the title of Geophysical Engineer. I completed my master's degree in 2005 and my doctorate in 2013 at Ankara University, Institute of Science and Technology, Department of Geophysics Engineering. During my doctoral education, I worked at TU Bergakademie Freiberg (Germany) for 1 year. In my doctoral study, I developed a new three-dimensional inversion algorithm for the interpretation of direct current resistivity data. I have been working as a Research Assistant at Ankara University, Department of Geophysical Engineering since 2004. My field of study is multidimensional modeling and inversion in applied geophysical methods. I have publications in journals scanned as SCI-index covering these topics, oral and poster presentations in international and national refereed congresses/conferences/workshops, and project studies supported by different sources as an executive and researcher.
