## FINAL REPORT EVALUATION

Reference number: 613458-EPP-1-2019-1-TR-SPO-SSCP

Relevance of the project	Score	Maximum
<p>The project was well in line with the specific objectives of European policies in the field of sport. The aim of the project was to answer the challenge of social exclusion of migrants in Europe, with a particular focus on addressing the compelling issue of systematic under representation of migrants in non-playing roles within Sport clubs and organizations. Project focused on employing the methodology of Education Through Sport (ETS) as a vehicle of up-skilling and curricular enhancement of Sport Coaches and Trainers working in the field with disadvantaged target groups with migrant background in the perspective of fostering inclusion and equal opportunities in as well as through Sport for migrants. The partners led the activity. In the frame of the activity, partners elaborated the specifics of a curriculum of Sport Manager Operator working with migrants as well as a Training Format delivered through Education Through Sport (ETS) for its development. The results of the project represent an added value at EU level, which could not have been attained if carried out solely in a single country.</p>	30	30
Quality of the project design and implementation	Score	Maximum
<p>The work programme included all appropriate phases – preparation, implementation, monitoring, evaluation and dissemination. The work programme as implemented was clear, complete and of good quality. The consistency between the project objectives, the methodology, the activities and the budget remained good throughout the whole duration of the project. The management arrangements were done in a good manner facing the COVID-19 crisis by arranging several online instead of on site meetings. This approach avoided to suspend or to extend the project duration. All these changes occurred without having negative impact on the outcomes of the project. The quality control measures put in place were of good quality. Project outputs were submitted to stakeholders at the national level, with a view to achieving feedback and suggestions for improvement. Surveying among stakeholders provided the informational background for the review of outputs, whose degree of successfulness was constantly assessed through evaluation of the outputs' first use among the targeted categories.</p>	17	20
Quality of the project team and the cooperation arrangement	Score	Maximum
<p>The project team included an appropriate mix of participating organisations with the necessary profiles throughout its life cycle so that all aspects of the project could be delivered.</p> <p>Each partner organization was in charge of specific responsibilities and tasks within the project, being responsible for meeting expected deadlines and results. Partner organisation worked cooperatively throughout the entire set of project activities (cooperation was ensured by the division of tasks and by equal representation in the Management Team). The staff remained stable during the implementation of the project, which added an advantage to the delivering of results. Roles and responsibilities were well distributed among the partners. The partners have been very active during the preparation and implementation of all activities, which has contributed to the achievements of the project's objectives.</p>	18	20
Impact and dissemination	Score	Maximum

# Annex 1

Impact and dissemination	Score	Maximum
<p>The project had a relatively big impact on participants and the participating organisations throughout its whole life cycle. Particularly with Sport operators involved in the local Pilotings of the "ETS Training Format for Sport Management Educators" for the development of the educational curriculum of Sport Management Educator working with Migrants. It allowed educators to directly take part in the delivery of Local Activities of empowerment in the field of Sport Management targeted at migrants in their own country, under the direction of the sending organisations. Migrants were involved in each partner country during the phase of Local Activities. The impact was also on partner organization, which cooperate throughout project activities. Its embedding an approach of transnational and cross-sectorial research on the up-skilling needs of migrants and educators provided a key dimension of project added European value.</p> <p>Dissemination was conducted in both the internal (i.e. targeted at partner organisations) and the external (i.e. targeted at external audiences) dimensions. The internal dissemination was performed through constant communication and cooperation throughout the project. The external dissemination was base on Sport operators in partner countries and in Europe, with a particular focus on those operating with migrants, migrants in partner countries and Europe, stakeholders in the field of Sport (Sport clubs and associations, Federations), stakeholders in the field of Education, formal and non-formal (NGOs, Educational Institutions, Universities, policy-makers (local/regional/national/ European public authorities). The outcomes were mainly communicated through the use of conventional communication and dissemination channels, via the organisation of local, regional and international initiatives.</p>	20	30
